

## ETRAGE WTPART BUNDLES

### DOWNLOAD COMPLETE WTPART BUNDLES IN ONE CLICK WITH ZERO WINDCHILL NAVIGATION WTPART SOLUTION KEY FEATURES

ETRAGE's WTParts Solution takes this bundle of related objects and makes it available OUTSIDE of Windchill, putting into ETRAGE Viewer while keeping the relationships intact. Meaning, users across all departments (Manufacturing, Shop Floor, Quality, Purchasing, Marketing, Supply Chain etc) can all get easy access to additional objects that relate to the design & development of parts, without needing to know how to navigate the often-complex PTC Windchill PLM interface.

#### WTPART SOLUTION KEY FEATURES

- One-click consolidated downloads — get ALL related documents for any WTPart in a single action, no hunting across tabs
- Complete WTPart bundles preserved — CAD Documents, Described By Documents, Reference Documents downloaded together with relationships intact
- Zero Windchill navigation required — access complete part documentation packages without knowing how to navigate PLM interfaces
- Always retrieves latest versions — automatically pulls current revisions of all linked documents, eliminating outdated file errors
- Available in ETRAGE Viewer — simple web interface accessible to all departments (Quality, Manufacturing, Purchasing, Compliance, etc.)
- Role-based access control — users only see WTParts and related documents they have permission to access
- Perfect for compliance and audits — quickly compile complete evidence packages for customer requests, ISO audits, internal reviews
- Supports multiple document types — PDFs, CAD files, test reports, specifications, certifications, vendor data—everything linked to the WTPart
- Batch processing capability — download complete bundles for multiple parts simultaneously for large documentation projects
- Customizable WTPart configuration — ETRAGE assists in configuring which document types are included based on your department needs

#### BENEFITS

- No CAD software required — view and download complete WTPart contents through web browser on any device
- Manufacturing-ready packages — shop floor gets complete production documentation without PLM training or engineering requests
- Purchasing efficiency — compile supplier RFQ packages (drawings, specs, reference docs) in seconds instead of hours
- **Perfect for compliance and audits** — quickly compile complete evidence packages for customer requests, ISO audits, internal reviews
